

MID YEAR PROJECT

2083

TRAILBLAZERS - BOOK 2

ABOUT MID-YEAR PROJECT

The Mid-Year Project is a cornerstone of the Digi Curriculum, mandatory for all enrolled students. It serves as a primary measure of development during Phase I, designed to move students beyond theoretical understanding into practical application. . With a weight of 50 Marks, it commands a significant 35% share in the Annual Digi Evaluation, underscoring its importance in the Digi educational journey. Beyond individual grading, the Mid-Year Project functions as a nationwide competition among all Digischool-enrolled institutions

MARKING SCHEME

Full Marks: **50 Marks**

Threshold Marks: **20 Marks**

Annual Evaluation Weightage: **35%**

ASSIGNMENT DESCRIPTION

TASK

You are required to develop a **Python application** that demonstrates the use of **lists and functions**. Several project options are provided, and each option is designed to assess the same core programming concepts.

- Personal Budget Tracker
- Word Scramble Game
- Student Grade Manager
- Grocery Shopping List App
- Number Guessing Game

Your Python application should be clear, informative, and well-structured, demonstrating the proper use of **function and list** according to the chosen topic.

GUIDELINES

- The program must include the following programming concepts:
 - Input Statements (4 Marks)
 - List (3 Marks)
 - Conditional Statement (3 Marks)
 - Loops (6 Marks)
 - Function (4 Marks)
- The program should have more than one useful feature related to the chosen topic, such as adding, viewing, searching, updating, deleting, calculating, or summarizing data. (10 Marks)
- The program should include a simple text-based menu that allows users to choose different options. The menu should continue running until the user selects an exit option. (5 Marks)
- The program should work correctly and give accurate results. It should handle invalid inputs properly, such as wrong menu choices, empty lists, invalid numbers, or incorrect data types. (5 Marks)
- The program should include creative features such as fun messages, a score system, progress tracker, final summary, or other unique elements related to the chosen topic. (10 Marks)

FILES TO BE SUBMITTED

- Python File (.py).

WHAT NOT TO DO

- Strict prohibition against plagiarism is in effect, and any project identified as a direct replication of another's work will be subject to rejection.
- Inclusion of images, language, or themes that could be deemed hurtful, disrespectful, or offensive to others is strongly discouraged in your project.
- Emphasize reliance on personal understanding and creativity, utilizing AI as a supplementary resource. Avoiding excessive dependence on AI is encouraged to preserve the uniqueness of your input.
- Adherence to project guidelines is strictly mandated. Deviation from these guidelines may have an impact on your assessment. If in doubt, seek clarification to ensure alignment of your work with project requirements.
- Safeguarding any confidential or proprietary information is imperative, ensuring that your project does not disclose sensitive data without proper authorization.

MARKING RUBRICS

PYTHON PROGRAMMING CONCEPTS (20 MARKS)

0-8	9-16	17-20
Fewer than four required programming concepts are included, or the concepts are used inaccurately or ineffectively.	Four required programming concepts are included, but there may be some inconsistencies or limitations in their implementation.	All required programming concepts are effectively included, showing a strong understanding and application of Python programming principles.

PROGRAM FEATURES & FUNCTIONALITY (10 MARKS)

0-4	5-7	8-10
The program includes very basic features only, or the features are not clearly related to the chosen topic.	The program includes some useful features, but it lacks variety or completeness.	The program includes several useful features related to the chosen topic, such as adding, viewing, searching, updating, deleting, calculating, or summarising data.

MENU-BASED PROGRAM FLOW (5 MARKS)

0-2	3-4	5
The menu is missing, unclear, or incomplete. The user may not be able to choose options properly.	A text-based menu is included, but it may have minor issues or may not run smoothly.	A clear text-based menu is included and continues running until the user chooses to exit.

ACCURACY AND ERROR HANDLING (5 MARKS)

0-1	2-3	4-5
The program has several errors, gives incorrect results, or crashes frequently.	The program works mostly correctly, but there may be minor errors or limited input validation.	The program works correctly, gives accurate results, and handles invalid inputs properly.

CREATIVITY AND UNIQUENESS (10 MARKS)

0-4	5-7	8-10
The program has very limited creativity or does not include any unique feature.	The program includes some creative features, but they are simple or limited.	The program includes creative and engaging features such as fun messages, a score system, progress tracker, final summary, or other unique elements related to the chosen topic.
